Laservision and ZEISS VISION CENTER Video Editing Guide

Oct 8, 2026

Purpose

This guide lists the editing settings used on Laservision and ZEISS VISION CENTER videos, so the in-house team can keep every reel visually consistent after the handover. All settings are taken from CapCut, the editor used for both accounts.

Both accounts share the same font, caption style, transitions and sound effects. The only difference between them is the text glow color.

Typography and captions

All on-screen text uses Montserrat Arabic Bold with the word-by-word fade caption template.

Element	Setting
Font	Montserrat Arabic Bold
Weight	Bold
Caption template	Word-by-word fade
Languages	English and Arabic (the same font covers both scripts)

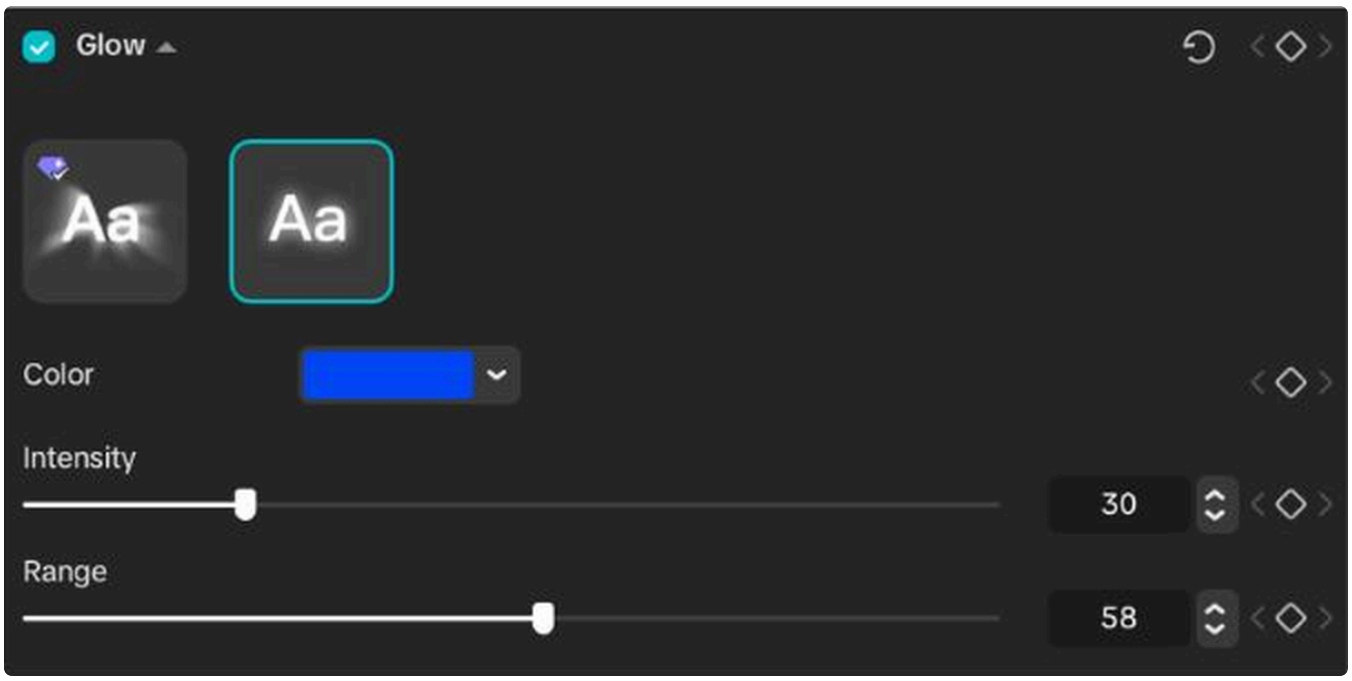

The word-by-word fade template as it appears in the CapCut caption templates panel.

Text glow and colors

Every caption gets a glow set to intensity 30 and range 58, colored by account.

Setting	Value
Glow	Enabled
Glow style	Second preset (the standard glow, not the premium one)
Intensity	30
Range	58
Color	Per account (see below)

Account	Glow color (hex)
Laservision	#005d83
ZEISS VISION CENTER	#0c188d

Glow colors by account

Same font, captions, transitions and sounds. Only the glow color changes.

Laservision

#005D83

HEX #005D83
RGB 0, 93, 131

Clear vision starts here

Caption preview · glow intensity 30, range 58

ZEISS VISION CENTER

#0C188D

HEX #0C188D
RGB 12, 24, 141

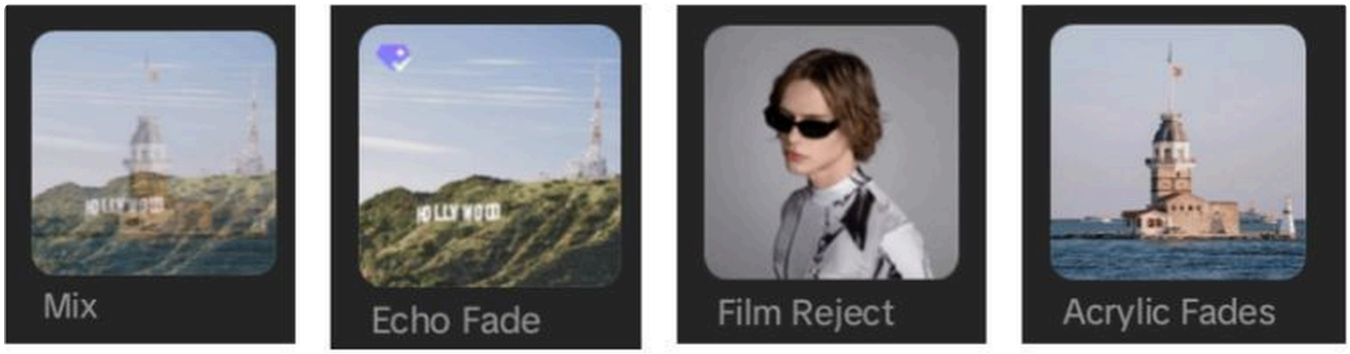

Clear vision starts here

Caption preview · glow intensity 30, range 58

The Laservision color matches the primary brand blue in the Laservision brand guidelines (Pantone 634 C).

Transitions

Four transitions cover almost every cut on both accounts.

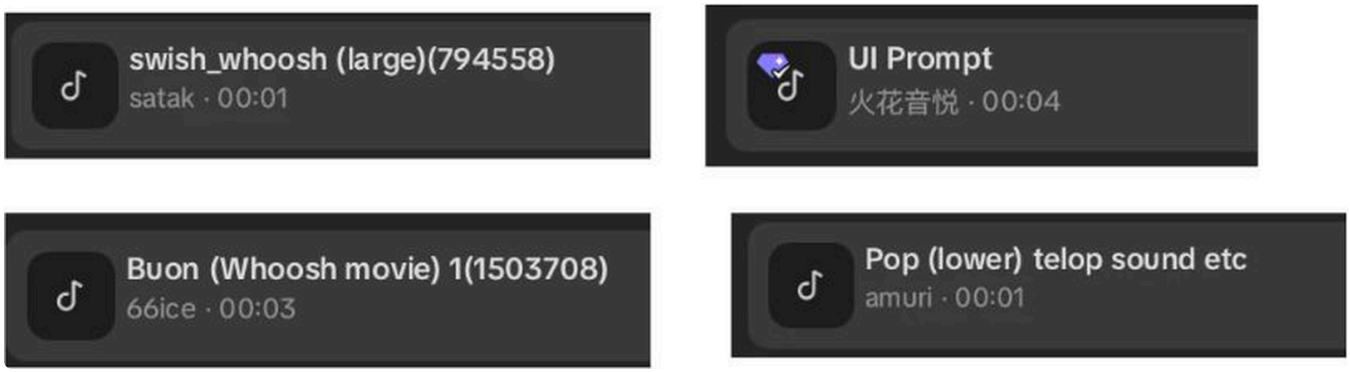

Transition	Access	Note
Mix	Free	Soft crossfade; the default choice between clips
Echo Fade	CapCut Pro	Marked with the premium badge in the transitions library
Film Reject	Free	Film-style flash for energetic or reveal moments
Acrylic Fades	Free	Frosted fade for calm, clinical transitions

Search each name in the CapCut transitions panel to find it.

Sound effects

Four short sound effects, all under five seconds, accent transitions and text pop-ups.

Sound effect (exact name)	Creator	Duration	Access
swish_whoosh (large)(794558)	satak	00:01	Free
UI Prompt	火花音悦	00:04	CapCut Pro
Buon (Whoosh movie) 1(1503708)	66ice	00:03	Free
Pop (lower) telop sound etc	amuri	00:01	Free

Search the exact names above in the CapCut sound effects library; the creator name confirms the right file.

Quick reference checklist

Run through this list before exporting any reel.

- [x] ~~Captions set in Montserrat Arabic Bold~~
- [x] ~~Word-by-word fade caption template applied~~
- [x] ~~Glow enabled at intensity 30 and range 58~~
- [x] ~~Glow color #005d83 for Laservision or #0c188d for ZEISS VISION CENTER~~
- [x] ~~Transitions limited to Mix, Echo Fade, Film Reject and Acrylic Fades~~
- [x] ~~Sound effects drawn from the four listed above~~

Echo Fade and UI Prompt need a CapCut Pro subscription. Without one, use Mix in place of Echo Fade and either whoosh effect in place of UI Prompt.
